Assignment 1C: Create Standards for Database Content

Field Name: Material

Type: List

Required: Yes

Description: A list of what material or materials of which each sock is made. This list contains text.

Rule: Provide these material options in the list: cotton, wool, silk, nylon, polyester, other. If made of multiple materials, omit blend percentages and instead list the materials that makeup the sock's fabric. List items must be separated by a comma.

Field Name: Size

Type: List

Required: Yes

Description: A list of sock size options. This list contains text, not just numbers, to separate size ranges by female, male and child size categories.

Rule: Itemize this list by size ranges, not individual sizes. The searcher will select the size category that fits them best. Each size range will contain four sizes. The smallest and largest size in each range will be listed with a dash between them, and one of these three letters to clarify size range category: W for women, M for men, C for child. Each range will be separated by a comma.
